Fast and Furious English Series

Fast and Furious English contains brilliant English lessons guaranteed to work with students who fail to see the point of writing. The 5-CD series contains lessons to spark the interest of all of your students, and extend even your most talented and gifted students.

You will find ideas for your students to write plays, scripts, storyboards, interviews, stories, descriptions, prose and poems. The writing tasks are both structured and open ended and your students will be able to discuss, explain, think, debate, edit and create and enjoy English lessons. CD1 is more suited to the lower school and years 7 and 8 but CDs 2-5 can be used anywhere in the school.

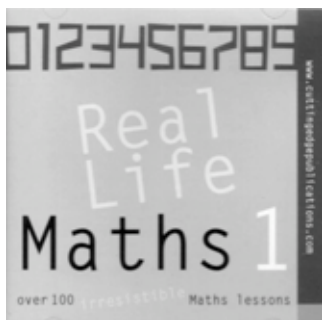

CD1	\$69.95
CD2	\$69.95
CD3	\$69.95
CD4	\$69.95
CD5	\$69.95

Real Life Maths Series

Real Life Maths is a new basic maths series for teenagers based on real life and teenage interests. Students can improve their basic numeracy and basic maths skills through topics which both interest and motivate them. This is the maths of high streets, shopping centres and home computers. The topics covered include cars, fashion, shopping, music, sport, cooking, etc. For the maths that students need to know both on the street and at home.

CD 1	\$69.95
CD 2	\$69.95
CD 3	\$69.95

Dyslexia and SEN Games Series

A series of 5 CD's with reading and spelling games to interest and involve the students you support. The reading and spelling games on each CD help your students to practise letters and sounds, word construction and whole word recognition. The games use a phonetic, linguistic approach and students are encouraged to practise their skills whilst playing a variety of games in supportive and stress-free environments without the fear of failure. Each game has its own ready-to-print card pack. All cards feature the same clear, large font and you can choose to print out cards at the standard size or photocopy them to be larger. Some of the cards have coloured illustrations but they are also designed to print perfectly as mono versions so cards can then be customised by students and coloured in. Teachers are also provided with the option of blank master cards so that games can be added to and adapted, and students can design their own card games and game boards.

CD1 – Football Snap, 2 Card Deal, Add or Take Away, Picture This and Checker Board.

CD2 – Football Snap Game 2, Picture This Game 2, One Two Three, Same Family and Stealing Points.

CD3 – Haunted House, Letter Squares, Same Family Game 2, Top Secret and Make It Rhyme.

CD4 – Premier Football Spelling, Haunted House Game 2, Spot, Talking Cards and Throw Away.

CD5 – Premier Spelling Knockout Cup, Haunted House Game 3, Search For Aliens, The Positive Game and Spell It.

\$69.95 each

Shakespeare Simplified Audio Texts

The power of sound is indisputable. It can relate a story, evoke an atmosphere, and transport you to another time and place. With a winning formula of charismatic narration, skilled actors, provoking music and vivid sound FX, our spellbinding range of multisensory audio CDs bring Shakespeare alive and wake imaginations. Giving the texts colour and a sense of context, these powerful tools are a solid foundation on which to build understanding. Average CD running time between 20 and 30 minutes, edited into short listening tracks. Copiable.

The Tempest \$69.95

Cracking the Challenging Class DVD

Bill Rogers
\$280.00

In these, his first video programmes, Bill Rogers explains and illustrates his tried and tested methods for Cracking the Challenging Class. With a total running time of two and a half hours, the programmes and comprehensive supporting notes provide a wealth of information, theories and lessons for primary and secondary teachers. In program 1, using role plays to support his presentation, Bill explains his unique methods of calming unruly pupils and maintaining order in the classroom. In program 2 Bill answers questions posed by primary and secondary teachers in a workshop forum. The substantial notes that accompany the programmes can be downloaded from www.bookseducation.com.

Dr Bill Rogers is a respected education consultant who travels frequently to conduct seminars with schools and universities in the areas of behaviour management, discipline, effective teaching, stress management and teacher welfare. He is renowned for his skill in these areas, as well as his sensitivity to teachers' needs and concerns.

Helping Children Hang On To Your Every Word

By Maggie Johnson, Illustrated by Robyn Gallow
\$59.95

Why is it that children who can least afford to switch off are the ones who don't pay attention? And that children who most need to ask for help are the ones least likely to do so? If children are opting out in the classroom, switching off or passively waiting for direction, we need to understand the barriers they face and help them engage by making their learning opportunities more meaningful, interactive and rewarding.

This book aims to make classroom experience more accessible to all learners,, and highlights the links between behaviour and hidden language processing difficulties. Based on tried and tested activities, strategies and self-help skills, you will find answers to these questions and ways of improving attention and concentration linked to a simple troubleshooting guide.

Classical Comics

Classical comics are about text in a new context, avoiding the possibility of Shakespeare and classical stories becoming redundant for the young. The highly visual format presents the original stories with a cinematic excitement which aids comprehension especially in today's visually-attuned children, and makes the text more accessible through three different text versions for varying reading abilities. The page and cell references are exactly the same in each format so that they can be taught simultaneously. Also available are study guides for teachers which offer a wealth of additional resources and activities centred around the text and its historical context.

Original text – the full and unabridged play in comic form.

Plain text – The complete play, translated into plain English.

Quick text – The full story with reduced dialogue for easier reading.

Study Guide – Teacher's resource with an extensive range of activities for students 10-17.

Tactile Sounds

By Kathleen Paterson

\$69.95

A fun and imaginative book to introduce very young children to the beginnings of literacy!

The child is taught to feel and trace the letters A-Z and there are sound matching exercises to link the initial letter sounds. Alphabetic ordering is presented through dot-to-dot exercises and games are used to teach the first 45 high frequency words children are expected to know by the time they are 5.

Literacy for Life Series

By Kathleen Paterson

A series of books covering years 1-6, with three books for each year, the Literacy for Life series is structured, comprehensive and easy to use. It allows you to build a week-by-week, term-by-term program spanning right through the primary years and beginning in year 0 with 'Tactile Sounds' (see above). Each book is fully photocopiable.

Year 1: Spelling and Sound Matching

These books include word lists and spelling patterns; phonic matching exercises; comprehension and cloze procedure activities; dictation and sound differentiation units. The students soon begin to recognise the pattern of exercises presented which helps them when new words and sounds are introduced. The sound families are taught in a logical way with one sound building upon and reinforcing the next. Games are included in Book 1 – a fun way to help learn the 150 high frequency words that children need to know by the end of year 2.

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Year 2: Spelling and Phonics

These books focus on spelling, phonics, grammatical awareness and vocabulary. The sound families continue to be taught and the student is encouraged to develop the use of words already learnt in writing exercises. Sound matching exercises, crosswords, word searches and 4 games are included in Book 1.

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Year 3: Spellings, Suffixes, Prefixes & Plurals

In these books dictionary work is introduced in exercises to encourage children to search for words to broaden their vocabulary and also their general knowledge. The rules of adding prefixes and plurals are explained and short stories are included to practice punctuation and sound differentiation.

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Year 4: Spellings, Homophones & Parts of Speech

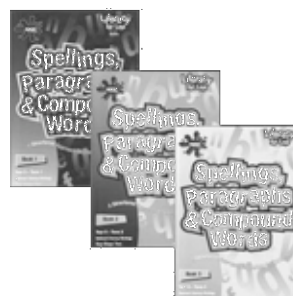

These three books continue to teach spellings, phonics, grammatical awareness and vocabulary required for Year 4. The stories, dictionary exercises, word searches and puzzles make this book an enjoyable way of learning the next stages. The rules for adding prefixes, suffixes and making plurals introduced in the Year 3 books are continued and simple parts of speech such as nouns, verbs, adjectives and adverbs are introduced.

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Year 5: Spellings, Paragraphs & Compound Words

The range of words in Year 5 is considerable and the exercises in these books help to point out patterns so that students can see the relationships between root words and how they can be changed into compound words by the addition of suffixes and prefixes.

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Year 6: Spellings, Connective & Compound Words

The books in this series are based on the writings of William Shakespeare, and the series introduces the final vocabulary required for Year 6. There are dictionary exercises to encourage pupils to find new words to add to the word families and more practise in using prefixes, suffixes and plurals. Pupils are given a variety of different styles of writing and an awareness of the use of idiomatic expressions.

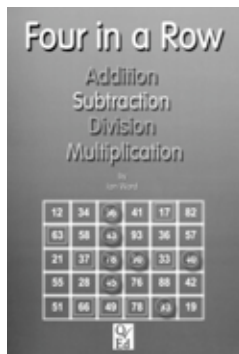

Book 1	\$69.95
Book 2	\$69.95
Book 3	\$69.95

Four in a Row

\$59.95

Four in a Row is a game of mental maths with very simple rules that children get to grips with very easily. It's suitable for primary and contains 130 photocopiable master sheets.

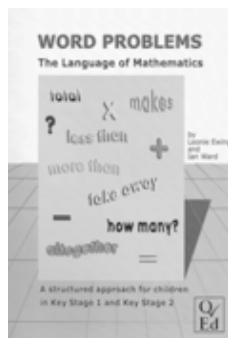

The book is packed with games that will encourage the recall of addition, subtraction, multiplication and division facts. Four in a Row is a game of mental mathematics with simple rules that children get to grips with very quickly. The games are all tried and tested in the classroom and there is a sufficient range of difficulty within each operation to enable the involvement of all ability groups. The structure and progression of the games will also enable pupils and teachers to set targets.

Word Problems: The Language of Maths

\$59.95

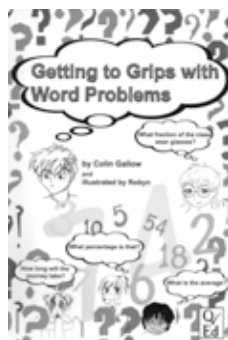

Using a gradual and structured approach, this makes a traditionally difficult aspect of mathematics much more accessible and comprehensible. This book takes a structured and varied approach to teaching the skills of solving word problems. The earlier part of the book uses a pictorial approach and often involves a practical activity e.g. cutting and pasting the relevant word sentences to match the word problem. Later pages are intended for older children and extend the introduction of simple writing frames. This book, packed with activities, can be completed individually or in pairs by children working together.

Getting to Grips with Word Problems

\$59.95

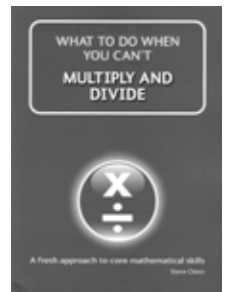

Is the language of maths causing problems for your pupils? Many children are able to cope in maths when asked to do calculations, but struggle when the same calculations are presented as written problems. For this reason, word problems are perhaps one of the least popular and most difficult aspects of primary mathematics. Getting to Grips with Word Problems provides a structured approach to help such pupils. Starting with the four main operations, pupils work through a format that not only trains them to think carefully about the way in which a problem can be attacked, but also promotes success before moving on to more challenging chapters. Each of the following chapters begins with a 'Getting to Grips with' section which helps to explain the concepts involved, followed by 'Solve It' sections with contextual questions for pupils to work through. The chapters deal with such concepts as decimals, percentages, fractions, money, averages and measurement – topics which pupils of all abilities may struggle with from time to time.

What To Do When You Can't Do Series

Steve Chinn

The What To Do series covers in five books, the important core mathematical skills, and offers students with maths difficulties practical strategies to overcome problems in key skills.

What To Do When You Can't Add and Subtract

This new text takes a fresh look at the basic skills of addition and subtraction. It offers a range of ideas to help students grasp the ideas of increasing and decreasing number values. **\$39.95**

What To Do When You Can't Do the Times Tables

This best selling title has been completely rewritten and offers students the range of ideas in a fresh approach to tackling times tables. **\$39.95**

What To Do When You Can't Multiply and Divide

Once students have gained an understanding of the first book then they can gain more skills using the strategies for multiplying and dividing numbers. **\$39.95**

What To Do When You Can't Tell the Time

The tricky subject of time is something which many students, whether dyslexic or not, struggle to get to grips with. The book discusses the language used, such as 'quarter to' and how to help students grasp the key concepts of time. **\$39.95**

What To Do When You Can't Do Fractions, Decimals and Percentages

The final book in the series looks at the more complex skills of fractions, decimals and percentages and offers a range of ideas and strategies. **\$39.95**

The Spelling Rulebook

\$39.95

The Spelling Rulebook has over 170 pages giving all the linguistic rules and phonic principles of English spelling. It is an indispensable reference book for teachers and students of the English language.

Using this book, an understanding of the spelling system of the English language can be developed and made explicit. It includes generalisations for the phonic spelling of sounds and words, syllable division rules, rules of affixing and plural rules. The book is particularly valuable in teaching those who have an implicit processing difficulty.

The Right Words: Teaching the Post-16 to Spell

By Dr David Armstrong

\$39.95

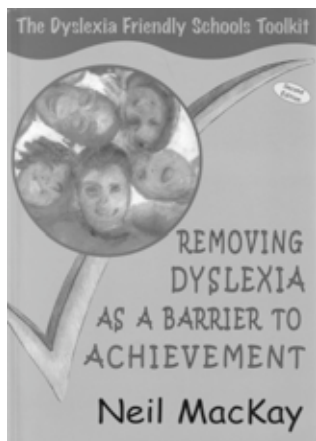

The Right Words: Teaching the Post-16 to Spell explains why and demonstrates how the tutor can help learners to beat poor spelling. In an accessible step-by-step way it takes the reader through the process of identifying a problem, dealing with the problem and reviewing progress. Advice is given on identifying spelling weaknesses and a range of possible approaches are described and evaluated. To make this book more meaningful Jill and Tony, two case-study students, are followed through this process. Throughout the publication close reference is made to the UK's National Adult Literacy Core Curriculum, so teachers can be confident that their work with the student meets the required standards. Guidance is also given as to how to use and understand the Literacy Core Curriculum and perspectives offered on some of the wider issues around teaching Literacy to those over 16. This book is a clear guide for those new to the topic but will also be an invaluable reference book for experienced teachers of literacy.

Removing Dyslexia as a Barrier to Achievement

Neil MacKay
\$89.95

A thought provoking and detailed look at the potential to create dyslexia-friendly learning environments in the classroom, full of practical guidance, empowering ideas and challenging assertions about inclusion.

The toolkit presents many strategies for meeting diverse needs including: understanding dyslexia, spelling with a specific difference, harnessing learning differences, learning styles and comfort zones, meeting diverse needs in mainstream settings as well as the dyslexia friendly classroom in the dyslexia friendly school.

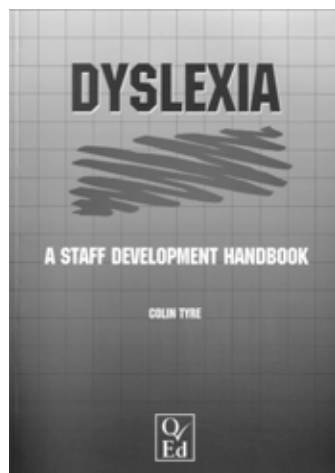

Dyslexia- Staff Development Handbook

By Colin Tyre
\$49.95

The aim of this book is to provide a frame work within which a teacher, or group of teachers, can develop an understanding of dyslexia. The author assumes minimum basic knowledge and provides limited but enough essential information so that some sense can be made of more complex theory and issues. The book contains photocopiable OHP master-sheets together with a description of how they can be used in staff development sessions.

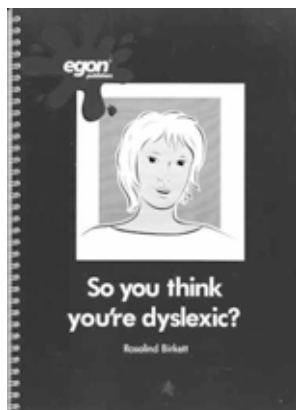

Dr Colin Tyre started his teaching in a Lancashire grammar school and then spent a decade teaching children with learning difficulties and those with emotional and behavioural problems. Dr Tyre has managed several major national research projects including "Computer Aided Teaching" and government funded research concerning dyslexia.

So You Think You're Dyslexic?

By Rosalind Birkett
\$19.95

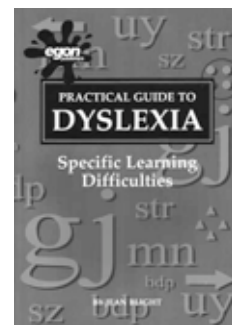

This is a book for teenagers and adults. The word dyslexia often causes concern and anxiety, so the aim of this book is to explain simply and sympathetically to the reader what is happening and how they can be helped to overcome their difficulties. 'So you think you're dyslexic?' is illustrated with line drawings by a teenage artist. Photocopiable.

Practical Guide to Dyslexia: Specific Learning Difficulties

By Jean Blight
\$19.95

This absolutely invaluable booklet helps parents and teachers identify dyslexia in both children and adults and offers straightforward practical help. An extremely useful and informative teaching guide for all age groups.

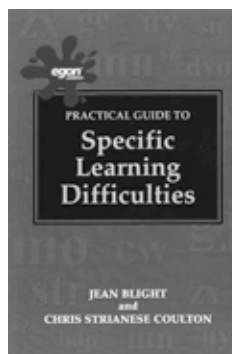

Practical Guide to Specific Learning Difficulties

By Jean Blight and Chris Strianese Coulton
\$19.95

This book explains the signs and symptoms of dyslexia, dyspraxia and ADHD and contains much helpful, practical advice.

It is written to help people understand children who are experiencing difficulties with learning and coping with life. Stories of successful dyslexics are featured in this book, together with invaluable information for parents and teachers requiring additional help.

Bullying: Managing fear in young children

By Dr Hannah Mortimer and Alan Johnson, Illustrated by Robyn Gallow
\$29.95

Where professionals and parents are concerned that a child is particularly vulnerable to persistent teasing or when a child has been bullied, they sometimes want a discreet approach for helping the child cope better. This book is a method of providing help using techniques taken from cognitive behavioural therapy and neuro-linguistic programming.

This book is part of a series written to help adults provide emotional support to young children aged 5 to 11. The books use a 'talk through' approach to provide a practical framework for adults. Dr Hannah Mortimer is an educational psychologist who also works freelance as a trainer and writer. She has written widely in early years magazines and is the author of many books on special needs, child development and behaviour. Alan Johnson is a specialist in Neuro-Linguistic Programming.

Fireworks: Managing anger in young children

By Dr Hannah Mortimer
\$29.95

This title in the series focuses on managing anger. It is presented as an interaction between an adult and a child to help it appear more personal and relevant. There are 12 practical sessions with the emphasis on involving the child in each. There are useful activities for working on relaxation techniques, comments from adults who have used the approach and a list of further resources to help. It can be used at home or at school.

Worry Box: Managing anxiety in young children

By Dr Hannah Mortimer
\$29.95

Sometimes aspects in children's social or emotional development are underdeveloped and get in the way of their happiness and well-being. These might present as high levels of anxiety, poor social skills, a very 'short fuse', and an inability to make friends. This book provides a practical framework to help adults provide emotional support to young children.

Brilliant Activities for Gifted and Talented Children

Ashley McCabe Mowat
\$39.95

A book full of ideas for classroom activities for ages 6 and up. Gifted children are not the only children who will benefit from this book. The activities cover many types of creative and critical thinking skills including comprehension, application, analysis, synthesis and evaluation, that enable all children to develop their cognitive processes. The activities allow room for creativity and open-ended answers so the work that children produce will be individual. Some activities can be stretched out for days, or the Brainteaser section can be used for a quick warm up.

Introducing Children To...

Eva Hoffman

A series of books with a wealth of activities and teachers notes explaining how to effectively introduce children to their brains, their intelligence, their senses and how they think. The books are suitable for very young learners and the activities can be treated as games. The skills learnt in these books will be valuable organizational and revision tools and the positive associations are more likely to make learning enjoyable and the students successful learners.

Introducing Children to Mind Mapping

\$69.95

Introducing Children to Their Intelligences

\$69.95

Introducing Children to Their Senses

\$69.95

Introducing Children to Their Amazing Brains

\$69.95

Understanding Living Things

The Brilliant Support Activities series contains photocopiable activities for use with slower learners or pupils with learning difficulties at middle and upper primary. The books introduce one concept per sheet, using simple language and clear, black line illustrations making them easy to read and understand. Each book contains 42 sheets which reinforce the methods of scientific enquiry by requiring students to plan, carry out practical activities, consider evidence, and present ideas and conclusions.

Understanding Living Things

\$39.95

Understanding Physical Processes

\$39.95

Understanding Materials

\$39.95

The Boxer Rebellion: A user friendly multi-sensory touch-typing course

- Students learn to spell as they learn the keyboard
- Uncluttered, dyslexia-friendly presentation
- Laminated keyboard chart included

This is the user-friendly touch-typing course that enables dyslexic students to learn those all-important keyboarding skills. A separate, laminated colour coded keyboard chart is included, enabling students to work without seeing the keys from the outset.

The Boxer Rebellion Colour Version

\$69.95

The Boxer Rebellion Black and White Version

\$59.95

Eye Level Reading Rulers

\$35.95

Eye Level Reading Rulers can help overcome glare and tracking problems caused by dyslexia and other disabilities.

For special needs, such as dyslexia, ADD and ADHD, scotopic sensitivity, autism, brain damage etc. For everyday use such as tracking text while word processing documents and for early readers needing help to follow the line.

- Narrow (approx 1 cm) strip for highlighting single lines of text
- Broad (approx 2.5 cm) strip for scanning ahead a paragraph, and for studying diagrams, tables, columns of figures, etc.
- Text marker (a solid line on the edge of the broad strip) for tracking down a paragraph
- Colours can be combined (e.g. To create mauve or green)
- Ideal for all ages– kindergarten to adult
- School, college, home or office use
- Easy to store, inexpensive to buy

Simply read the text through either of the tinted plastic strips of the selected colour, and track down the page: broad strip for paragraphs, narrow strip for single lines. Packs consist of **3 turquoise blue, 3 yellow, 2 green, 1 pink, 1 lilac blue**

Phonic Wordsearch

\$45.95

A book of wordsearch fun covering all the main phonic families, with a unique code feature that gives an extra dimension of enjoyment and learning potential to a selection of the activities. Short vowels, long vowels, consonant blends, and digraphs, soft c and g, w rule and other silent letters are all covered in this useful and fun resource. Use the free accompanying code disk to load this code font onto your hard drive and add a fun code element to your own worksheets.

Box Dictations

A structured series of phonic dictation sentences with corresponding letter-shape grids providing visual support for spelling for children (and adults) who experience the common dyslexia-related problem of failing to map the sounds of onto their shapes.

The benefits of box dictations:

- Children enjoy them and are more likely to get the spellings right and thus increase confidence
- The presence of the boxes gives the child valuable clues as to the shape of the word and the number of letters in each word
- The shapes provide vital clues as to which letters to choose
- Children are more likely to put in capital letters

Box Dictations Stage One

\$59.95

Short vowels, consonant digraphs, consonant blends, vowel-consonant digraphs, w-rule, ff/ll/ss, soft c, soft g

Box Dictations Stage Two

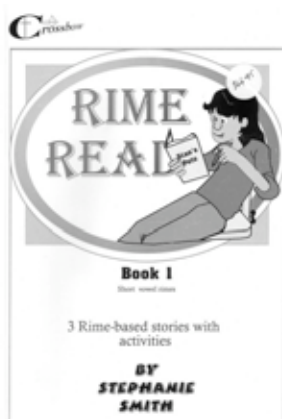

\$59.95

Long vowels, plurals, suffixing rules

Rime Read

A structured cumulative collection of photocopiable rime-based stories and activities in 3 parts starting with AT, IT, etc words and ending at IGHT. Written and illustrated by an experienced teacher of dyslexic children, these excellent books bring a welcome touch of humour and a useful range of activities to slightly older children with reading difficulties.

Rime Read Book 1 (short vowel rimes)

\$49.95

Rime Read Book 2 (short and long vowel rimes)

\$49.95

Rime Read Book 3 (long vowel rimes)

\$49.95

Deebees

\$45.95

Break through the b/d barrier– a colourful, fun board game to help overcome b/d reversal problems. It's fun, and it works. The visual impact of the board, the use of red and blue, and the kinesthetic aspect of how the game is physically played, all add up to make this a powerful multisensory resource to help students break through the b/d barrier.

Spingoes

Spingoes combine spinner games with bingo sheets to enable students to play fun multisensory games with a class group of any size. Spingoes provide onset and rime wordbuilding practice with up to 115 rime families of eight words each, providing a solid phonological basis for reading and spelling.

Each of the two sets contains approximately 60 games, including 10 recap games packaged in a sturdy hinged plastic box. One sheet displays two games. A clear plastic spinner unit is provided with each set. Spinners can also be used with other phonics activities, or with an OHP for whole-class work.

Spingoes – Short Vowel Rimes

\$65.95

Short vowel rimes: AT, IP, OP, UN, etc (CVC rimes); ACK, ING, UMP, etc (CVCC rimes)

Spingoes – Long Vowel Rimes

\$65.95

Long vowel rimes: OO, EE, and magic-E rimes; other vowel digraph rimes AIN, EAT, OIL etc, and GHT rimes

Alpha to Omega Pelmanism Games

\$69.95

Alpha to Omega Pelmanism Games is a comprehensive pack of phonics games for teaching phonemes and spelling rules. It includes 18 phonic games from dyslexia teaching pioneer Prof Bevé Hornsby, linking with Stage One of the Alpha to Omega program. It is also easy to link into any phonics lesson plan.

TOTAL
