

Problems with reading or maths?

If you find reading slow and difficult or have trouble spelling you may have dyslexia.

If you find it hard to calculate or numbers don't make much sense to you, you may have dyscalculia.

Would you like to help us learn more about these problems?

We are looking for 18-40 yr olds **with reading or maths difficulties (or both)** to take part in a research study about causes/symptoms of learning disabilities. It involves 2-4 hours of testing (interviews, written, and on computer) on up to two occasions. All participants will receive a detailed copy of their test results.

To find out more, or volunteer, email LDstudy.auckland@gmail.com, or phone 373-7599 ext 83401. To see if you're eligible, we'll first give you a 10 minute phone interview.

This study is being conducted by Dr. Karen Waldie (Senior Lecturer) and Dr. Anna Wilson (Honorary Research Associate) of the Department of Psychology at The University of Auckland.

APPROVED BY THE UNIVERSITY OF AUCKLAND HUMAN PARTICIPANTS ETHICS COMMITTEE on 20/03/2008 for a period of 3 years from 20/03/2008. Reference number: 2008/008.
